

Bring your Community to SRI2022!

The Sustainability Research & Innovation Congress (SRI Congress) is the world's leading transdisciplinary event that unites global research leaders, experts, and innovators to inspire action and promote sustainability transformation. SRI Congress is a joint initiative of Future Earth and the Belmont Forum that offers a space for dedicated advocacy for sustainability scholarship and innovation, and cross-sectoral collaboration and action.

In 2022, the SRI Congress is coming to South Africa. Hosted by the Future Africa Institute at the University of Pretoria, SRI2022 will be held online and on site in Pretoria, South Africa, from June 20-24, 2022.

The Congress will build on the success of the **first SRI Congress**

June
2021

700
speakers

2,000
participants

100
countries

The program of SRI2022 will double in size from last year.

For the first time, SRI is offering an option for **Institutional Registration**. This is an opportunity for your university, institution, or network to gain exclusive access to the world's largest transdisciplinary meeting in sustainability, with a discounted price.

We offer two types of Institutional Registrations:

Institutional Viewing Room:

Live stream the SRI2022 sessions and events of your choice at your venue and invite an unlimited number of participants to join you in person. This will create an SRI "Viewing Room" and allow you to organize a small in-person event at your institution.

Regular: \$2000
Low and middle-income country: \$500

Institutional Group Tickets:

A Group Ticket allows up to 50 participants from your institution to attend SRI2022 online, from their own devices and from wherever they are.

\$1000
**Exclusive opportunity for low and
middle-income countries**
